

Year 1 Knowledge Organiser – Science - Plants and Seasonal changes

Key Vocabulary		Diagram / Visual	'Sticky' Knowledge	
wild plants	A wild plant seed grows where it falls. It doesn't need to be planted or cared for as it grows.		In places like the UK, there are four seasons each year, autumn, winter, spring and summer.	
garden plants	Garden plants are plants that people choose to grow in their gardens.		The weather includes the temperature outside, the wind direction and strength, as well as rain, cloud, snow and sun.	
Weed	Weeds are wild plants that grow in places where people don't want them.		Daylight is when it is light outside. The amount of daylight changes with each season.	
deciduous	A deciduous tree loses its leaves each year.		<p>Important Facts</p> 	
evergreen	An evergreen tree keeps its green leaves all year round, even in the winter.			
migrate	to move from one region into another.			
hibernate	(of an animal or plant) spend the winter in a dormant state.
