

Keep Your Children Safe Online:

Did you know that as a parent we are able to control what your children do online not only on websites but on their computer consoles. Surveys have been carried out in 2024 and it shows that around 21% of parents in the UK use the controlling apps on their smartphones. There are so many computer consoles and a large majority have apps that you can use.

All apps for the Xbox, Playstation, Nintendo Switch, VR Head Set are designed so parents can not only be able to see their children's recent activities i.e. what games they have played. You can also control and remove any friends they have added and also remove people who they don't know. You can also see what messages are sent and received by other users.

All the apps are so easy to download on either iStore or Playstore.

1 in 6 children between the age 8 and 15 get bullied every day. This isn't acceptable.

There aren't just apps for computer games, there are also apps for your children's phones. So you are able to keep them safe too.

We would urge all parents to take the correct procedures to ensure your kids are safe when playing online.

Apps:

XBOX APP:

You can find the Xbox app on your mobile device's app store (Google Play or Apple App Store) and on a PC via the Xbox app for Windows. To connect to your console, download the app, sign in with your Microsoft account, and then follow the on-screen prompts to either set up a new console or add an existing one.

Mobile app links

Google Play Store: [Xbox app for Android](#)

Apple App Store: [Xbox app for iOS](#)

PLAYSTATION

You can find the official PlayStation app links on the Google Play Store for Android and the Apple App Store for iOS. These apps allow you to connect with friends, get the latest news, manage your account, and download games to your PS4 or PS5 console. You can also link your PlayStation Network (PSN) account to the app to manage its features.

For Android

Download from Google Play: PlayStation App on Google Play

For iOS

Download from Apple App Store: PlayStation App on the App Store

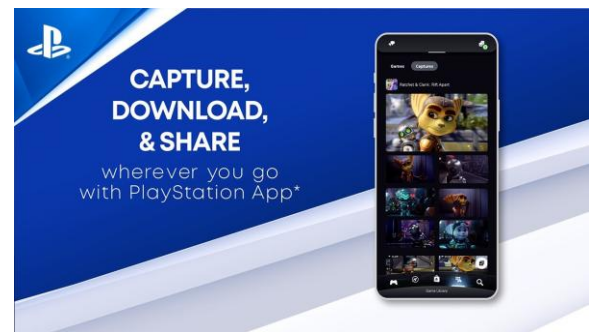

To link your console to the app

Open the PlayStation App and sign in to your PSN account.

Go to Settings and select Link Console to App.

Follow the on-screen instructions to complete the process.

Make sure you are signed into your PSN account on the console you want to link, as well as on the app.

NINTENDO SWITCH

You can find links to the Nintendo Switch Parental Controls app in the Apple App Store and Google Play Store.

These apps allow parents to set time limits, restrict games based on age, and manage online communication for their child's Nintendo Switch console.

Apple App Store: Download the app from the Apple App Store.

Google Play Store: Get the app from the Google Play Store.
